Disclaimer: The company is responsible only for its own products and services and maintenance services, and joint and several liability for data loss caused during product use, the Company does not assume.

1.Connector

Connection diagram:

Connection diagram:

1.Connector

Connection diagram:

IR Remote:

1.Connector

Output port:

- 1.DC 5V Power: Power input port,DC 5V 2A (Without any external device only need 800mA Current)
- 2.RJ45 LAN:10M/100M/1000M Ethernet port
- 3.Optical: Audio optical output port
- 4.UHD :Ultra HD 2.0 output port
- 5.3.5mm AV Out :RCA (left, Right and video output)
- 6.External antenna wifi
- 7.T-flash Card: support up to 32GB
- 8.USB HOST: 3*USB 2.0 host for connecting the mobile devices,1*USB2.0 OTG used for Firmware upgrade
- 9.Reset :reset button is used for restoring factory setting and Firmware upgrade
- 10.LED: it indicates blue when plug the power . It is red under standby mode
- 11.Microphone: Built-in Microphone
- 12.IR Receiver
- 13.Camera:used for taking photos
- 14.Power button on/off
- 15.VGA: VGA output port,

2.Device connection Instruction

- a.Insert the UHD cable attachment connect with the LCD TV, monitor or projector's Via UHD port, and switch signal source of the TV as the same as the device (Please refer to the TV manual).
- b.Power Connection: Use the supplied power adapter and a USB cable with DC head, DC 5V input device connected to the port, (Note: Do not use any other the power adapter which does not match with the device)
- c.This products can match IR RC.We also suggest using 2.4G wireless keyboard or mouse. Plug 2.4G receiver on USB Host connector. Or plug on USB OTG port by port converter. If only mouse plugged, the device will provide virtual keyboard in operation system. If the device detected the physical keyboard ,the virtual keyboard will be hidden automatically.
- d.Mouse left button for "OK", right button for "return", rolling for page up and down, holding left button to pull icon or copy & paste file. Holding middle button for Properties.

3.Boot state

After connect with power adapter for about 10 seconds, the boot screen would appear the icon of cloudnetgo:

Then go into animation of Cloudnetgo interface:

3.Boot state

For about 30 seconds , device would access to main screen;

4.Main Screen Introduction

4.1 Move/Delete desktop icon

Long-press any icon in the main interface, you could put it in any position as you like ,at the same time you could put the other apps shortcut to the main interface.

4.Main Screen Introduction

4.Main Screen Introduction

4.4 Application

Click to show up all the installed program and setup tools icon.

■ If the first desktop page with full of APK icon, then pull or rolling mouse will move it to second desktop page;

■ You could launch these program or set up directly or hold this icon and throw them to desktop to make shortcut;

Click then hold any button to make shortcut on desktop;

5.Settings

In the system user can setup according to their own requirements, such as network connection, language, input methods, video output resolution, sound output and check storage space.

 It is in tool bar or mani interface. Click it then will show up below options:

5.1 WIFI Setting

When opened WIFI player would search available wireless router signals within 20 meters ,user just choose a router and input correct password then could browse internet ; if the router without password, player would connect it directly.

5.Settings

5.2Bluetooth settings

Open Bluetooth settings, check the allow attachment search Bluetooth devices, the device named cloudnetgo , paired with a phone or other Bluetooth device, after successful pairing will be transmitted via Bluetooth playback multimedia files to a local disk for this device (long press one file ,then choose sending by bluetooth).

5.3 Ethernet (USB wired LAN) settings

If there is no WIFI network, we recommend using a wired network priority (RJ45 LAN), using RJ45 port to connect the network cable, then firstly disable wifi in the settings WLAN, and enable Ethernet, so that the wired network will automatically connect to the Internet. This mode supports static IP settings, support 10M/100M/1000M network.

5.4 Traffic usage

In traffic usage state, on the right status bar, you can monitor two network modes, each application cycle and traffic flow, etc.,and it is optional if you drag by left or right.

5.5 More

- airplane Mode: Enable airplane mode, then WLAN (Wi-Fi) and Bluetooth will be disable automatically..
- The Tether and portable hotspot
- USB Tethering : Displays the current connection status when using the USB card.
- Portable WLAN hotspot: Only support Ethernet state ,WIFI hotspot sharing.
- Setting WLAN hotspot: can do some modifications and storage to the setting of WLAN hotspot network SSID, security, passwords.
- Bluetooth Tether: can choose whether to select the Bluetooth connection on our device to share Internet.
- VPN:
Tip Note: You need set a lock screen PIN or password to use credential storage, and there are three ways to lock the screen as follows:
 - Pattern: By drawing unlock pattern, Set unlock password.
 - PIN: By setting a PIN code to unlock the password.
 - Password: By setting numbers and letters to unlock a password.

5.Settings

But for VPN of android TV box, please choose the second way by PIN password, the detailed operations as follows:

- A.click the button "setting"→ "more"→"VPN"→ "PIN".
- B.Pls input your PIN password, and you need to input it twice. because this is your frist time to use VPN on this device, so it need a PIN password, this is a password that you can set it as no matter what you like , but for avoiding future the unnecessary problems, pls write it down just for better memory.
- C. pls click the sign "+" on the top right corner of the after-inputting PIN password screen, then you will see such a interface "Edit VPN profile"→①input a better name on the taskbar "Name"(you could choose whatever names you like)→②on the taskbar "Type", please to choose "PPTP"→③ on the " server address" , please input your own VPN proxy server address→④ please click the taskbar "show advanced options"→⑤ please input "8.8.8.8." on the taskbar "DNS servers" →⑥ pls click the below button "save".
- D. Please click the "PPTP connection"→ input the user name and password of your own VPN→"save" your account information→ pls to click "connect"

• Mobile networks:

The enabled mobile networks is optional and workable.

• PPPoE dialing:

If your home or office network needs to dial-up, please connect the RJ45 LAN network cable port, click the "Settings" → "more devices" → "PPPoE dial-up" → "PPPoE Account" enter the account name, user name and password and save, then open "PPPoE dial-up connection" to achieve dial-up Internet access.
